

This tab contains the monitoring assignments for all broadcast stations and cable systems in the state of Oregon.

1. All stations are listed in order of frequency. Frequencies change very seldom.
2. Call letters are listed (which change frequently)
3. The Operational Area is defined
4. The monitoring assignments are designed to provide an outlet for all four sources of EAS messages
Federal EAN messages and Statewide messages (same source)
Weather Messages
Local Messages
The first two columns are the two "required" monitoring assignments as specified by the F.C.C. rules
The next columns are optional monitoring assignments that facilitate greater reliability of the Local Plans.
5. The sections are listed for FM stations, AM stations, TV stations, and Cable Systems
6. Cable System listing because of size only show the first two required monitoring assignments. The electronic version contains the optional monitoring assignments.

Note: This Tab is designed to be fluid and change frequently to reflect the real-world reality of the changing broadcast industry. The intent is to allow all four sources to be broadcast on every station and allow the real-world of reception those sources.

As many stations are co-located in one studio with one encoder / decoder, the assignments will be same for all stations. If one of those stations is the primary for the operational area, the assignments will reflect the same inputs for all collocated stations.

As changes are made to the monitoring assignment list they will be posted on the web page; www.sbe124.org / EAS / Tab 4. on a periodical basis. This document is composed with Microsoft Excell. As this original document maintained by the SECC chair is changed frequently, the FCC's field office will be sent the changes electronically as soon as they are made.

Notes: On the list of monitoring assignments, Primary Stations are in **BOLD**

Low power FM stations are in small letters.

Stations that have not been documented as capable of decoding amber alerts are in *italics*

Amended Monitoring Assignments

There are certain situations whereby broadcast stations and cable systems are located within certain areas of the state where monitoring two EAS sources is not possible. The rules specify how these stations can operate with exception of this requirement in Part 11.52 (d) (1).

- (1) If the required EAS sources cannot be received, alternate arrangements or a waiver may be obtained by written request to the FCC's EAS office. In an emergency, a waiver may be issued over the telephone with a follow up letter to confirm temporary or permanent reassignment.

The "Alternate Arrangement" as indicated in the rules is as follows:

In this amendment to Tab 4 all the stations and systems affected by this rule shall be listed in the table below. As conditions change, and more than one EAS source become available this table will change and the resultant changes will be forwarded to the local F.C.C. field office in Vancouver Washington.

Exceptions to Monitoring Assignments:

Station	Monitoring Assignment	Reason for the Exception
KJDY-AM/FM	k218BA 91.5	KJDY-AM/FM is the Primary Station for Grant and Wheeler Counties. Located in an isolated geographic area, they have only one EAS source, a translator for KOPB-FM in Portland. Therefore they have the ability to only receive the national and state messages. There is not any weather radio available or any connection to local law enforcement. Station personnel would perform any Local activation. KGNR-FM a local public station in John Day would have two sources to monitor, KJDY and K218BA.
KWSO-FM	KWLZ-FM	Located in an isolated geographic area, where there is only one other EAS source that can be received at the studios. That station KRCO-FM has studios in Bend that can receive KOAB-FM for national and state messages, The weather service for weather messages, and KLRR-FM for local messages. Monitoring this lone station will allow KWSO to fully participate in the Oregon Plan.
KLCR-FM	KOAP-FM	KLCR is the Local Primary for Lake County. Located in an isolated geographic area, where the only EAS source. KOAP-FM is an OPB public broadcast affiliate whose signal is delivered by microwave. Therefore KLCR-FM can receive all national and state messages. There is not any Weather radio available and there is not any connection to local law enforcement. Station personnel would perform any Local activation. KXIX a local station in Lakeview would have two sources to monitor. KLCR and KOAP.

CAPITOL AREA OPERATIONAL AREA

The area includes the counties of Marion Polk and Yamhill Counties.

TAB 4 for the LANE COUNTY OPERATIONAL AREA

The Lane County Operational Area consists of the entire area of Lane County. Media companies maintain studio locations in the communities of Eugene/Springfield, Cottage Grove, Oakridge, and Florence, Oregon.

An EAS Encoder is located at the Lane County Sheriff's office and all local emergency messages are launched only from there.

Also the area in Douglas County west of the coast range mountains. There are studio facilities located in Reedsport, Oregon.

In the event of Douglas County needing to activate a local emergency message in the Reedsport area, Lane County and Coos County will launch duplicate messages.

The state primary entry point source is KOPB-AM 1600. They are directly tied to KOPB-FM in Portland, Oregon's "Primary Entry Point" Also connected to this source are; KQFE-FM 88.9, KXOR-AM 660, KLZS-AM 1450, KVAL-TV 13 and KWAX-FM serves as an alternative source for both state and local emergency messages when KOPB-AM's signal is not available.
